

Brownie's Marine Group, Inc., Introduces (3) Diverse Products at
both Annapolis Boat Shows!

Pompano Beach, Florida , Oct. 03, 2019 - Brownie's Marine Group, Inc. (OTC Pink: BWMG) a leading developer, manufacturer and distributor of modern recreational diving products and onboard compressed air solutions announced presentation of (3) highly diverse innovations designed with "Diving Made Easy" concept in mind. NEMO™, SeaLiOn™, and YachtPro™ Essential will be on display at the Annapolis Powerboat Show, October 3-6, 2019 and Annapolis Sailboat Show, October 10-14, 2019 at **BOOTH D-73**.

NEMO by BLU3™, the World's Smallest Diving System, is an ultra-portable, air-travel friendly, compact, affordable, and easy-to-use dive system with a 1¼ - pound submersible battery pack that powers the automatic air delivery system for an average of one hour. NEMO is the ideal dive tool and toy for both power and sail boaters alike. NEMO exceeds the size, weight, ease of use and price-point goals learned from Brownie's past interactions with the Annapolis boating community.

SeaLiOn™, tank-less diving system outperforms all commercially available battery-powered dive systems on the planet by a large margin and matches or exceeds traditional gasoline powered hookah dive systems by leveraging advanced battery technology and Brownie's latest Variable Speed Diver Synchronized Control technology (VSDS). The new VSDSC senses the divers breathing demand and automatically varies the compressor speed and volume of air to provide exceptional breathing quality, with the depth and run-time performance divers have come to expect of the most capable surface supplied dive systems. The SeaLiOn battery powered hookah system will support multiple divers for 2 to 3 hours on a single "INSTA-change" 18-pound battery pack. The SeaLiOn VSDSC technology includes a user selectable depth control feature supporting (4) divers to 15-ft, (3) divers to 33-ft and (2) divers to as deep as 65-ft. SeaLiOn will be on display at both the Annapolis Power Boat and Sail show for the first time.

YachtPro Essential™ (YPE) by LW Americas, is the optimal high-pressure air and Nitrox compatible compressor for refilling SCUBA tanks, SBCA bottles, and providing air for general air service applications onboard. The YPE is fully automated, VFD integrated (soft start), includes multiple fill whips and is optimized specifically to meet the demanding conditions and rules unique to boat building and yacht diving. The YPE is by far the very best overall value when considering a SCUBA tank fill system for anyone wanting to SCUBA dive on their own schedule.

Robert Carmichael, Brownie's Chairman and CEO stated, "I am very proud and excited to be back in the wonderful Annapolis community representing Brownie's Marine Group and introducing the fruits of our years of innovation in response to the exacting needs of this demanding audience as we continue on our mission: "Diving Made Easy"!
