

BROWNIE'S MARINE GROUP'S SUBSIDIARY, BROWNIE'S THIRD LUNG' "BIAS" (BOAT INTEGRATED AIR SYSTEM) FEATURED IN SCOUT BOATS NEW PROMOTIONAL VIDEO / WEBSITE AS KEY FEATURE

**Pompano Beach, FL, July 10, 2019** (GLOBE NEWSWIRE) — Brownie's Marine Group, Inc. (OTC Pink: BWMG) a leading developer, manufacturer and distributor of hi-tech diving solutions, is proud to be featured as a key component of Scout Boats' all new video marketing promotion. Scout's high-tech, state of the art, feature-rich designs can be equipped with Brownie's BIAS (Boat Integrated Air System) and E-Reel hose management systems direct from the factory or at the local dealer level, adding a 2, 3, or 4 person tank-less diving dimension to a line of vessels already turning heads and redefining the approach to aquatic adventures.

Brownie's Third Lung' "OEM" program was created to support boat builders and boat dealers worldwide with integrated battery-powered and AC powered diving solutions. The Brownie's BIAS product group is ideal to enhance every boat owner's experience by allowing easy diving on demand. The OEM program is tailored to attract the leading edge boat builders around the globe that recognize the competitive edge Brownie's integrated dive solutions can provide. The installation of a BIAS package can be implemented at time of build for a new boat or installed at the dealership thanks to coordinated installation plans. The OEM/dealer program enhances the boat owner's scope of utilization and generates an additional revenue center for the boat builder/dealer; truly a win-win. Brownie's VS (variable speed) battery powered BIAS tank-free diving packages are available for all size boats while the high pressure YachtPro "Essential" SCUBA tank compressor system allows vessels with AC power to recharge SCUBA tanks and supply air to the BIAS for Third Lung type tank-free diving. The breathing air quality BIAS package also accommodates a wide range of other air uses onboard a vessel such as air horns, pneumatic door/hatch openers, after-wash dry-down and water toy / fender inflation.

Installation of the Brownie's Third Lung BIAS system is boat builder / dealer friendly, and comes complete with specifications, mounting templates, mechanical drawing packages and installation assistance from the Brownie's team.

The "E-Reel" Hose System features a level winding 150-ft main hose recovery system that quick connects to Brownie's proprietary "Peleton Hose System" for 2, 3, or 4 divers, making deployment and storage a breeze through a customized hawse fitting equipped with hose guide and rewind switch/circuit protection. Whether you're diving for recreation, dinner or for prop and hull maintenance, you can rest assured that Brownie's has you covered - we created "Diving Made Easy."

Robert Carmichael, Brownie's CEO stated, "We are very honored to be featured as
